Intellectual Property Right

Organized by

Department of Physics

26/02/2020

Department of Physics

ONE DAY WORKSHOP ON INTELLECTUAL PROPERTY RIGHT

WORKSHOP REPORT

One day Workshop on “Intellectual Property Right” was held Seminar Hall Padmbhushan Karmasibahi Science & Technology Bhuvan in the premises of K. J. Somaiya College of Arts, Comm. & Science, Mohanirajnagar, Kopargaon on **26th February 2020**.

Inaugural Speech by Hon. Principal Dr. B. S. Yadav

Hon. Prof. Dr. Sanjay Dhole, Department of Physics, S.P.P. University, Pune and Hon. Principal Dr. B. S. Yadav inaugurated this conference. Dr. B. B. Bhosale, Incharge, Faculty of Science opened the session with welcome address to chief guest. Principal, Dr. B. S. Yadav clarified the approach and his views behind conducting this Workshop.

In **Session-I Dr. Sanjay Dhole** focused on the basic concepts of Intellectual Property Rights. “Intellectual property” are type of property that results from creation of the human mind, the intellect. Intellectual property management starts with the germ of an idea. IP by itself neither helps nor hinders development necessarily. It is how laws, policies and practices are designed and used in different countries that determine whether IP is effective for development purposes. In his presentation on intellectual property he has placed itself on a pedestal in the context of economic growth and is becoming increasingly important. Intellectual Property (IP) is the fuel that powers the engine of prosperity, fostering invention and innovation. The increasing significance of intangible assets in the global economy is

forcing business organizations to actively manage their IP as a key driver for building and sustaining their competitive advantage and achieving superior performance.

Session: I- Speaker; Dr. Sanjay Dhole, Department of Physics, S.P.P. University, Pune

IP has gained center stage and has attained more focus, more attention and is a subject matter of discussion between government, institutions, industries under various regimes and protocol that are put in place to ensure that the world in which we live, where knowledge and innovation are the engines of development and growth. In that world, those who have the creative minds and ability should feel assured that not only their efforts have been duly recognized but it is secured in a specified manner.

It is also important to promote intellectual property licensing practices, particularly, with a view to foster creativity, innovation and the transfer and dissemination of technology to developing countries and least developed countries. There has to be both free transfer of technology which will address the challenge of climate change and also transfer of recourses to poor countries.

I'M HERE

AHMEDNAGAR

WED, 26 FEB 2020

In **Session-II**, **Dr. Sanjay Dhole** discussed on Enforcement of IP rights is another major area which deserves serious mention in the policy. There should be effective enforcement of the IP laws so that the issues of piracy and counterfeits which results in huge losses to various industries can be mitigated. Hence capacity building activities must be carried out with vigor to enhance the IP enforcement in the country and to make India a destination for international IP Filings.

I'M HERE

AHMEDNAGAR

WED, 26 FEB 2020

Session: II- Speaker; Dr. Sanjay Dhole, Department of Physics, Pune

Further, there are intellectual assets and then there are intellectual properties- intellectual properties are where a government gives you an authority in return of an annuity, just like normal property; but before an IP there is something called the intellectual assets, where you keep them as trade secrets.

Dr. B. B. Bhosale spoke on IPRs play a crucial role as the legal vehicle through which either the transfer of knowledge or the contractual relationship is affected.

Alternatively, knowledge may be exploited in-house, in which case the role of IPRs is to block imitating competition. Commercialization can be defined as the process of turning an invention or creation into a commercially viable product, service or process. Commercialization may require additional R&D, product developments, clinical trials or development of techniques to scale-up production prior to taking the results of research to market. This is important because not all inventors or creators wish or have the resources, skill and appetite for risk to commercialize their own inventions or creations.

In this workshop **70 students and 25 faculty members** participated. The workshop gave very good learning experience to all the participants and it was ended the hope that there would be positive approach regarding Intellectual Property Right.
