स्वच्छ भारत : समृद्ध भारत विशेषांक

“महाराष्ट्रातल्या प्रत्येक राजकीय कार्यकर्त्याची 'खासियत'  
नेमकी ओळखणारे यशवंतराव चव्हाण  
कै. के. बी. रोहमारे यांना संबोधत ते 'कारभारी' या नावाने !  
खरोखर त्यांचे सारे स्वभावधर्म,  
'कारभारी' या शब्दात एकवटलेले...  
पुढाऱ्यापेक्षा कारभारी ही काही वेगळीच चीज असते.  
तो जबाबदारी खांद्यावर घेणारा असतो,  
जबाबदारीने वागणारा असतो.  
परखडपणे सुनावणारा.. राजी-नाराजीची पर्वा न करणारा  
....संयमी पण स्पष्ट भूमिका घेणारा असतो.  
हे सारे 'कारभारी' पण घेऊन के. बी. साहेब  
सार्वजनिक जीवनात वावरले.  
राजकारण, अर्थकारण, शिक्षण, समाजकारण,  
शेती, सहकार  
या ग्रामजीवन व्यापणाऱ्या सर्वच क्षेत्रात  
के. बी. साहेबांच्या प्रभावाचा एक काळ होता”

## Global water scarcity and the safety of drinking water are today's concerns and tomorrow's crisis

- Rohan Virendra Yadav

- Dr. B. S. Yadav

K. J. Somaiya College, Kopergaon, Dist: Ahmednagar

### Introduction:

Water is an essential resource and crucial element for sustain life and human activities. Over 97.2 % of water is found in the oceans as saltwater, 2.09 % in icecaps and glaciers, 0.6 % available on groundwater, and 0.11 % runoff and surface water. Ensuring Safe drinking water is most important for public health concerns. The presence of contaminants in the water is becoming a major serious problem and consequently, affects the drinking water quality. The microorganisms related to waterborne diseases are present in contaminated waters like bacteria, Viruses, helminths, and protozoa. Waterborne diseases like Typhoid fever, Malaria, Hepatitis, Amoebic dysentery, Diarrhea, Enteric fever, Gastroenteritis, Cholera. As reported by UNICEF, in 1993, 3.8 million growing children under age five loose one life during they are mainly affected by diarrhea diseases because of poor drinking water. In India in 1992 in which over 3,52,980 cases in addition to 735 deaths were recorded. The case of malaria in which around 1.87 million cases of malaria with 1006 deaths recorded from the country in 2003. The outbreak of hepatitis is most frequent, with about 60,000 cases recorded in the U.S. every year. This explosion takes place because of an unsafe water supply and inadequate sanitation. In the case of Amoebic dysentery, the protozoan infection is perhaps severe nevertheless, as elucidated at outbreaks in Chicago (1933) in that about 1400 persons were afflicted along with 98 deaths occurred during potable water was polluted because of sewage carrying an Entamoeba histolytica. Apart from this water scarcity is increasing on an alarming rate. Without assuring the availability of safe water for all users, global sustainability will be impossible to achieve. Despite being one of the UN2030 agenda's primary goals (SDG6) for sustainable global development (UN, 2015), the current water deficit is rapidly worsening and affecting an increasing number of residential,
